Overview

- List all tests that were performed

Team Logo
Here
(If You Want)

Drop Test Configuration

- List drop test requirements
- Explain how the drop test was set up
- List materials used
- Show picture of test fixture

Team Logo
Here
(If You Want)

Drop Test Procedures

- List procedure for the drop test

Drop Test Results

- Show picture of just before drop test
- Show picture of how cansat was secured for drop test
- Show picture of cansat after drop test still attached to the drop test fixture
- Perform functional test and determine if cansat still functioning
- Provide a link to the video showing the drop test
 - Video must show securing the cansat to the fixture
 - Video must show the cansat held before dropping
 - Video must show the complete drop and end of test
 - Video must be less than 5 minutes

Thermal Test Configuration

- List thermal test requirements
- Explain how the thermal test was set up
- List materials used
- Show picture of test fixture

Thermal Test Procedures

- List procedure for the thermal test

Thermal Test Results

- Show picture of just before thermal test
- Show picture of how cansat was secured for thermal test (laying in box, on a mount, etc)
- Show picture of cansat after thermal test
- Perform functional test on cansat and determine if it still works
- Provide a link to the video showing the thermal test
 - Video needs to show inserting the cansat in the thermal chamber
 - Video needs to show the chamber operating at 60C
 - Video needs to show the removal of the cansat from the chamber.
 - Video does not need to show the whole 2+ hours of testing. Keep it under 5 minutes.

Vibration Test Configuration

- List vibration test requirements
- Explain how the vibration test was set up
- List materials used
- Show picture of test fixture

Vibration Test Procedures

- List procedure for the vibration test

Vibration Test Results

- Show picture of just before vibration test
- Show picture of how cansat was secured for vibration test and explain how it was secured
- Show picture of cansat after vibration test
- Perform functional test on cansat and determine if it still works
- Provide a link to the video showing the test
 - Video must show the cansat being secured to the test fixture
 - Video must show the complete test
 - Video must show the cansat after the test
 - Keep video under 5 minutes

Vacuum Test Configuration

- List vacuum test requirements
- Explain how the vacuum test was set up
- List materials used
- Show picture of test fixture

Vacuum Test Procedures

- List procedure for the vacuum test

Vacuum Test Results

- Show picture of just before vacuum test
- Show picture of how cansat was secured for vacuum test (laying in box, on a mount, etc)
- Show picture of cansat after vacuum test
- Explain results of the test
- Provide telemetry as a csv file
- Provide a link to the video of the test
 - Video must show the cansat being attached to the fixture
 - Video must show the complete test
 - Video must show the state of the cansat after the test
 - Video should be under five minutes.

Summary

- Summaries how tests worked and explain any failures
- Describe any corrections needed to get the cansat to pass the environmental tests
